

# LOGSAVERS® & FLITCHSAVERS®

## Plastic "Stitches" for Hardwood Logs

LogSavers® and FlitchSavers® are used to control existing splits and checks in the ends of valuable hardwood logs, leading to higher yields with less waste.

- Durable high quality thermoplastic material
- New LogSavers design provides 50% increase in strength
- Control existing splits and checks in valuable veneer logs
- Eliminate black stains in log ends caused by common S-irons
- Do not need to be removed prior to cutting
- Will not damage saws or veneer knives
- Safe, hands-free installation using our proprietary hammers
- LogSavers size: 4 in/10 cm
- FlitchSavers size: 2.5 in/6 cm
