

LIFELINE WOOD RENEW is a concentrated powder that is mixed with water and applied to wood. It removes stains and discolorations caused by dirt, mold and weathering renewing the natural beauty of the wood. WOOD RENEW is excellent for preparing wood for a new coat of stain.

Sample Application Instructions

1. *Pour the entire contents of the sample container into one quart of clean water. Stir until the granules dissolve then wait about ten minutes for the solution to thicken. Do not attempt to mix Wood ReNew in a sprayer.*
2. *Once the solution thickens, it may be applied with a brush.*
3. *Apply the solution to the surface of the wood and allow it to remain on the wood for approximately ten minutes. If it begins to dry out, apply a light mist of water to keep it damp.*
4. *If necessary use a hard bristled brush or stiff broom to help clean the surface.*
5. *Rinse thoroughly with a pressure washer. Apply from the bottom up, rinse from the top down.*
6. *Heavily stained or discolored areas may require a second application.*
7. *Rinse plants after use.*

Coverage: One quart of Wood ReNew solution will clean between 35 to 40 square feet of wood surface area.

Wood ReNew is sold in a one gallon container that makes 20 gallons of cleaning solution, enough to clean approximately 3000 square feet of wood surface area.

Safety and Handling

Keep out of reach of children. Wood ReNew will not harm plants when used as directed. Leaves no residue harmful to humans or animals. CAUTION: Dry powder is an eye irritant.

First Aid

Eye Contact: Immediately flush with large amount of water for 15 minutes. Seek medical aid. **Skin Contact:** Remove from skin and wash thoroughly with soap and water. Brush off and/or remove contaminated clothing. **Ingestion:** Drink large amounts of water to dilute. Do not induce vomiting. Seek medical aid if irritation persists.
